

Construction, Demolition and Renovation Materials

All incoming loads report to Scalehouse.
Customer declares location waste was generated from and material type.
Customer is directed to the Construction & Demolition (C&D) Area (Spring-Fall)

Loads are inspected by equipment operator.
Customer will be instructed to unload material based on the following options.

Source Separated Material
(One C&D Material Type Only)

\$75/tonne

Unsorted C&D Waste
(Spring/Summer/Fall ONLY)
Must contain minimum 60% mixed C&D Material (no shingles), sorted by OVWRC

\$175/tonne

Contaminated Load
C&D Material with more than 40% contamination (Garbage, insulation, etc.).
Load sent to Landfill.

\$225/tonne

Customer Sort

Customer chooses to sort material into designated C&D material types.

Customer given option to scale in and out OR pay tipping fee based on largest quantity of material in load.

NOTES

This flowchart is reflective of 2016 Tipping Fees.
Loads **MUST NOT** contain hazardous or electronic waste.
Asbestos insulation requires special disposal and pre-approval.
Visit www.ovwrc.com for more information.
