November 19, 2026

Dear Local Business:

RE: 2 – Day Compost Sale - $0/yard – Limited Time Pricing

As you may know, the Ottawa Valley Waste Recovery Centre (OVWRC) produces compost at our facility located at 900 Woito Station Road. We currently have an abundance of source separated organics (SSO) compost available.

SSO compost is produced from green cart material collected curbside in various Renfrew County Municipalities. It is Grade A compost, however, it tends to have a higher salt content and may contain non-organic items such as plastic. It must be mixed with other soil material if being used for a plant/flower growing medium.

The Centre needs to move SSO compost to alleviate some on-site storage issues. Therefore, the Ottawa Valley Waste Management Board has approved updated pricing for SSO compost. It will be made available at a bulk rate of $0/yard for 12 cubic yards or more purchased at one time. This rate is in effect for SSO compost until December 31, 2026.

Here are the details of the sale:

- Dates: November 25 & 26, 2026 (weather permitting – if significant rain will cancel)
- Time: 8:00 a.m. – 2:30 p.m. (last truck on-site at 2:15)
- First come, first serve, while supplies last
- Enter Gate 1 and proceed onto the scale.
- Trucks will be directed across the road via Gate 2 (please travel slowly through the Centre's main parking lot).
- You do not have to report back to the scale house once loaded.

A lab analysis report is available upon request for any purchased material.

For more information, please contact Elizabeth Graham, Communications & Special Waste Supervisor at 613-735-7537, ext. 216 or egraham@ovwrc.com.

Sincerely,

E. Graham
